

NATURAL COSMETICS

We are a leading European manufacturer of natural and organic cosmetics, one of the leading companies dedicated to manufacturing to third parties and selling cosmetic distributors of white label products.

As a manufacturer of natural cosmetics, we help you identify what types and properties natural cosmetic products have and how we formulate for normal, oily, dry and mixed skin with custom ingredients such as 100% natural Aloe Vera, with honey, papaya, with pulp, Argan oil or with snail, rosehip, tea tree and with special specifications such as vitamins, multivitamins, collagen or retinol.

We manufacture creams, ointments, essential oils, soaps, lotions, gels, clays and white marks.

Our **I + D Department** is responsible for developing new products while constantly updating the database of raw materials and novelties in the market.
