Clase:	Actinopterygii
Orden:	Perciformes
Familia:	Moronidae
Género:	<i>Dicentrarchus</i>
Especie:	<i>D. labrax</i> (LINNEO, 1758)

EUROPEAN SEA BASS (*Dicentrarchus labrax*)

ΛΑΒΡΑΚΙ - BAR-SPIGOLA-LUBINA-WOLFBARSCH-ROBALO-ZEEBAAR-ΠΑΒΡΑΚ-LEVREKU

Due to its swiftness and its aggressiveness, it is also known as the wolf of the sea (Loup de Mer). Its body is oblong and slim, similar to other fast-swimming fishes. On its back it has two fins. The first one is supported by spikes and the second is soft, but strong.
